

# Quick Talk™ vS Wireless Vehicle Detection System

## Quick Talk™ vS Wireless Vehicle Detection System

Long Range (2,500ft +) and Battery Powered

Provides 24/7 monitoring... "Senses" ANY vehicle: Cars, Trucks, Motorcycles, ATV's, Golf Carts, even Bicycles... and instantly transmits a "Custom Voice Alert Message" over your 2-way radio system.

It even works through radio repeater systems for miles of extended range.

- "Senses" any vehicle and transmits alert message, long range to your two-way radio.
- "Talks" to your two-way radio — works with virtually any brand of business band two-way radio.
- 1 Mile Range\* — Optional antennas and/or repeaters can be used to provide miles of extended range.
- Provides a custom "Voice Message Alert" to two-way radios anywhere within range of the transmitter, NOT just to a single monitoring point.
- Easy-To-Install. No trenching. No long cable runs.
- Battery Powered — over 7,000 transmissions on 6AA alkaline cells.
- Automatic "Low Battery" Message.
- 24 foot "Sensing" Range with Gain Control
- Digital Voice Storage Capability allows Custom Voice Messages
- 2 Contact Closure Input Capability
- Programmable Message Repeat Scheduling
- Made In USA

\*Line-of-sight, no obstructions.

## Enhanced Security for Business/Industry and Police/Government

### Applications:

Golf Clubs/Resorts -Provides wireless alert to attendants/caddies. Insures that attendants/caddies are ready and waiting when the member/guests arrive.

Construction Sites -Alerts personnel if vehicles enter via restricted access areas or after hours.

Stationary Assets -Protect chemical storage facilities, farm equipment, construction equipment, remote buildings and sites

Police/Security -24/7 monitoring and surveillance of sites prone to theft or vandalism.

Government/Military -24/7 monitoring of restricted access areas e.g. high security areas/bases, military assets, border crossings, national parks, walking trails, parks.

Ranches, Private Property -24/7 remote monitoring of property lines, large parcels of land, prevent theft of livestock and equipment

Plants/Factories/Retail Stores -Alerts personnel (during normal or after hours) that a vehicle has entered a restricted area e.g. rear entrance/loading dock/pick-up area/restricted area.

Go Beyond Normal Limits...™
