At the push-of-a-button ...communicate with multiple work groups, coordinate activities or expedite orders. Rugged and dependable, the new D-Series Jobcom portable radios will empower any work crew to get more done, more efficiently than you ever thought possible.

With Jobcom radios communication is instant. There are **no air time charges or service fees**, busy signals, or phone numbers to remember. Jobcom radios transmit directly from one radio to another...no extra equipment is required and they're compatible with virtually any other two-way radios operating on the same channel frequencies.

Each D-Series radio can be tailored for your specific need. For example: each D-Series radio can be programmed to display as few as 1 channel or as many as 10. Features like channel scan, weather scan and weather alert can be turned on or off depending on the need, they're powerful and feature rich, yet flexible

Lightweight, small and easy to carry yet capable of withstanding a 6 foot drop onto concrete. In fact, ounce for ounce Jobcom radios are tougher than any other professional business radio in it's class.
